

A group of approximately 15 piglets of various breeds, including white, pink, brown, and spotted, are gathered in a straw-covered pen. Some piglets are standing, while others are lying down. In the background, there is a wooden fence and a dark building. The scene is lit with warm, golden light, suggesting late afternoon or early morning.

Pork Cut Chart

Pigs are hardy and versatile!
They turn pasture plus excess dairy & veggie into fresh pork, bacon, hams, ribs, sausage, hot dogs, kielbasa, salami and more! Pigs produce valuable manure for the fields and gardens, till and weed gardens, naturally eradicate pest insects and weeds, clean up crops & clear brush. Every bit of a pig is useful! See: <http://sugarmtnfarm.com/halfpig>

Butcher Main Cuts in Pink
Done in Numbered Order

Notes:
Archimedes, shown here, is a 700 lb boar - not your typical hog. He might yield about 455 lbs of lean cuts. Boars have less fat. Pastured pigs in general have less fat than grain fed pigs. Pasture gives good Omega-3 fatty acids & lower in bad Omega-6's. Pastured meat is healthier for you & the pig. A typical finisher is 200 to 240 lbs at slaughter and yields about 100 to 140 lbs of cuts. Thus a half pig is 50 to 70 lbs. A half pig fits tightly in a large picnic cooler easily in two. Approximate cut weights for a half pig shown here include fat trim which can be rendered for cooking and stew bones like the hocks for soup. Get the oddments to maximize your yield - it's all good eating.
